snehin-adepu

CS Engineering (AI & ML) student with 1+ year of internship experience in backend systems, LLM optimization, and cloud infrastructure (GCP, AWS). Reduced AI inference costs by 70%+, deployed production systems supporting 1,000+ concurrent users, and presented conference research in IoT security (99.03% DDoS detection accuracy) with a co-authored book chapter conditionally accepted for publication. Seeking software engineering, ML engineering, or backend development roles.

EDUCATION

B.TECH., COMPUTER SCIENCE ENGINEERING (AI & ML) | CGPA: 8.55 | 2023 - PRESENT
VNR VIGNANA JYOTHI INSTITUTE OF ENGINEERING & TECHNOLOGY, HYDERABAD

INTERMEDIATE | GRADUATED WITH 95.3%| JUN 2021 — MAY 2023
SRI CHAITANYA JUNIOR COLLEGE, HYDERABAD

10TH GRADE | SECURED 89%| JUN 2020 — MAY 2021
SURYA THE GLOBAL SCHOOL, HYDERABAD

INTERNSHIPS

Tech Enterprise Automation Intern — Eli Lilly and Company | Jul 2026 - Present

- Developing enterprise automation solutions integrating ServiceNow and multiple enterprise data sources.
- Building an AI-powered daily summarizer that aggregates updates from Jira, GitHub, email, calendars, and other internal platforms.
- Collaborating with engineering teams to develop scalable automation solutions that improve information accessibility and operational efficiency.

AIML & Backend Intern — Loomylabs | May 2025 - Nov 2025

- Optimized LLM prompting pipelines, cutting inference costs by 70%+.
- Deployed backend services on GCP using CI/CD pipelines with networking and DNS configuration.
- Designed Supabase PostgreSQL schemas and ran load tests for 1,000+ concurrent users.
- Evaluated AI frameworks and cloud tooling to support architecture decisions.
- Worked with Vertex AI and Generative AI tools to evaluate and benchmark LLM performance for production pipelines.

Project Intern — Alfago Research LLP (Price Feed Tracker) | Oct 2025 - Dec 2025

- Built a pipeline fetching OHLCV market data every 5 minutes, processing 50,000+ records/day with zero data loss.
- Stored data in AWS S3 using Apache Parquet, cutting storage costs by ~35% and improving query speed 2x.
- Developed time-series aggregation logic (1m/5m/1h/1d) for downstream analytics.

TECHNICAL SKILLS

Languages: Java, Python, C
Web & Backend: FastAPI, Node.js, Express, React, Vite, TailwindCSS
Databases: PostgreSQL (Supabase), MySQL
Cloud & DevOps: Google Cloud Platform, AWS, Docker, Kubernetes, Terraform, Jenkins, Git, GitHub, CI/CD
ML/AI: CNNs, XGBoost, Prompt Engineering, Model Benchmarking, Vertex AI, Generative AI, Agentic AI
Tools: Postman, Artillery, k6, Figma, Tableau, Power BI
Core Concepts: Data Structures & Algorithms, OOP, REST APIs, System Design Basics

LEADERSHIP & ACTIVITIES

Design Lead - Krithomedh (AI/ML Club)

- Directed end-to-end branding, poster design, and visual identity for 8+ technical events and workshops, increasing event registrations by an estimated 30% through professional design standards.

Documentation Lead- ISOC Organization VNRVJIET

- Led a documentation team, standardizing report formats and workflows across technical events.
- Reduced rework by ~25% through improved traceability and structured documentation processes.

Sponsorship Committee Member — VJ MUN 2025

- Led sponsorship outreach campaign, contacting 100+ companies via cold emails, calls, and follow-ups; contributed to securing 5 confirmed partnerships.

STRENGTHS

- Leadership
- Communication
- Public Speaking
- Problem -solving
- Agile learner
- Systems debugging

HOBBIES

- Exploring Tech
- Dance
- Cooking
- Reviewing Apps

ACHIEVEMENTS

Academic

Conference Paper Presentation – ICONFEST 2025

"Securing IoT Networks Using Hybrid Machine Learning Model Against DDoS Attacks"

- Presented a hybrid XGBoost–CNN intrusion detection system achieving 99.03% DDoS detection accuracy with automated firewall mitigation for IoT networks.

Conference Paper Presentation – ICICA 2026

"Home Garden Irrigation Control System Employing Hexagonal Layout and Geometric-Depth Moisture Sensing"

- Presented a smart irrigation system using hexagonal sensor layout and geometric-depth moisture sensing, reducing water use by ~57%.

Book Chapter — Frontiers of Hybrid AI: Neuro-Symbolic Approaches and Innovations"

"Major Tools and Techniques in Neurocomputing" (Conditionally Accepted)

- Co-authored a peer-reviewed chapter on neurocomputing covering deep learning (CNNs, RNNs, Transformers), Spiking Neural Networks, neuroevolution (NEAT), neurosymbolic AI, and neuromorphic hardware (Intel Loihi, IBM TrueNorth, SpiNNaker); applications across BCIs, robotics, NLP, and edge IoT.

Co-curricular

India Innovates 2026 (Top 1000 Nationally)

- Selected among top 1000 teams nationally; presented JanSamadhan, an AI-powered civic grievance platform, at Bharat Mandapam, New Delhi (March 2026).

Chaos2Clarity, Synergia 2026 @ BVRIT (First Place)

- Cleaned a 10,200-row conflict displacement dataset using Python, engineered features, and built Power BI dashboards tracking 50M+ displaced people across 8 conflict zones (2022–2024); won ₹4,000 prize.

Startup Race (Second Place)

- Pitched an innovative smart electricity management and EV charger deployment solution; outperformed 50+ competing teams.

Speaker – AI Tools Workshop, AI Week 2026

- Delivered a hands-on session on modern AI tools and practical workflows at VNRVJIET, engaging 150+ students with real-world AI use cases.

Extra-curricular

Telangana State-Level Roller Skating Championship (Second Place)

- Showcased discipline, resilience, and sustained competitive performance at the state level.

ACADEMIC PROJECTS

JanSamadhan — AI Civic Grievance Redressal Platform

- Built an AI-powered civic issue reporting platform with complaint classification, multilingual support, WhatsApp integration, and real-time tracking dashboards.
- Selected among top 1000 teams nationally at India Innovates 2026, presented at Bharat Mandapam, New Delhi.

AI-Based Historic Monument Restoration & Virtual Tourism Guide

- Combined iPad LiDAR scanning and SAM (Segment Anything Model) to reconstruct a 3D temple model, deployed as an interactive Unity walkthrough with mobile optimization.
- Eliminated costly LiDAR equipment and GPU-intensive NeRF training; captured full structure in 45 minutes.

Uber Rides Analysis (ML)

- Analyzed 500,000+ ride records, engineered 12 features; trained XGBoost model achieving RMSE of 1.84.

CERTIFICATIONS

- **DevOps with Real-Time Practical Exposure** — Brainovision Solutions India Pvt. Ltd. (AICTE) | Jul – Nov 2025 CI/CD, Docker, Kubernetes, Terraform, AWS, Jenkins, containerization & cloud-based workflows
- **Tableau Training** — Internshala Trainings (Skill India / NSDC) | Mar 2024
- **Smart Coder** — Smart Interviews | 2025
